

SHARP EL-556

$$Y_B - Y_A = X \rightarrow M \quad X_B - X_A = \boxed{a} \text{ RM } \boxed{b} \rightarrow \text{ZC} \Rightarrow \underline{\underline{d}}$$
$$\boxed{b} \Rightarrow V^{\circ \text{dec}}$$

$$d \quad \underline{a} \quad V^{\circ \text{III}} \rightarrow \text{DEG} \quad b \quad \text{2nd F} \Rightarrow XY \Rightarrow \Delta X \quad X \rightarrow M_1$$

$$b \Rightarrow 63.180 + 200 = \underline{\underline{YB}}$$

$$MR \Rightarrow \Delta X + X_A = \underline{\underline{XB}}$$
