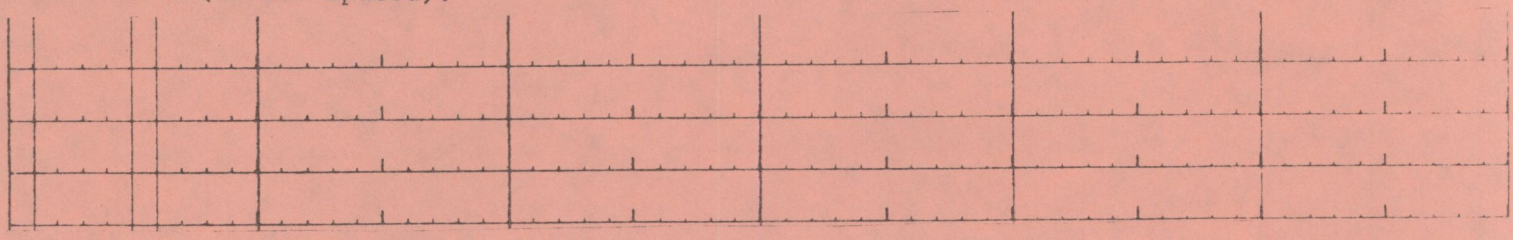
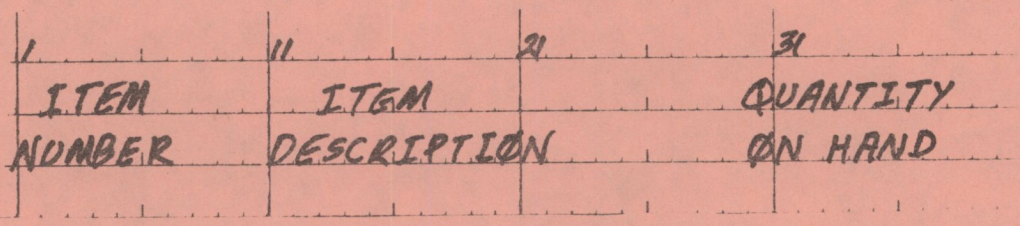
(8pts) 19. We wish to print the data from the card read in the previous problem. Thus you should use the variable names you used in the previous problem. The report layout is as follows:

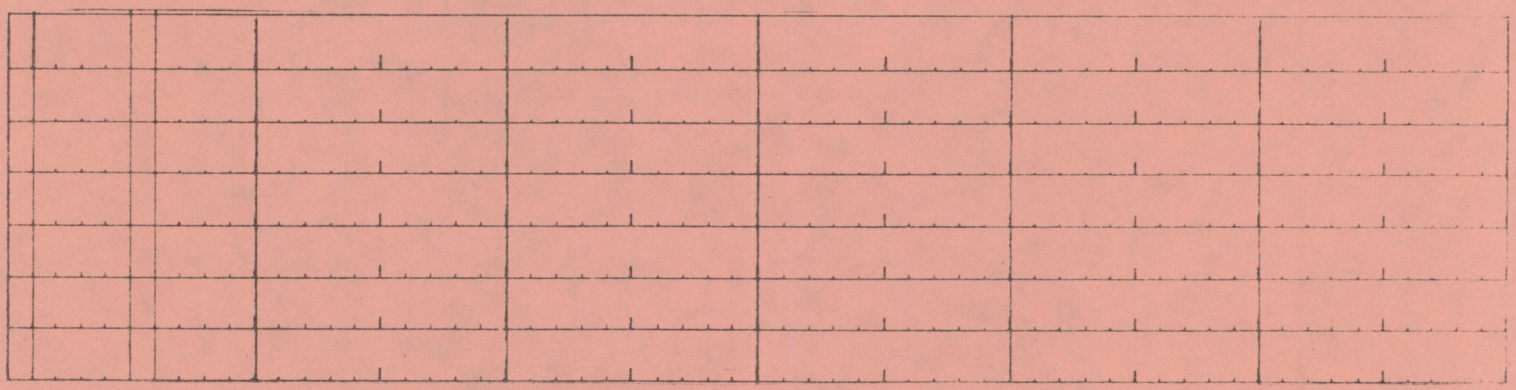
Report columns	Description
1-6	Item Number
8-28	Description
30-35	Quantity on Hand (XXXXX.)
40-45	Price (XXX.XX)

On the following coding form, write the FORTRAN statements necessary to print the above line (double spaced).



(8pts) 20. Consider the following report headings to be printed at the top of a new page:





On the following coding form, write the FORTRAN statements required to print the above headings.
