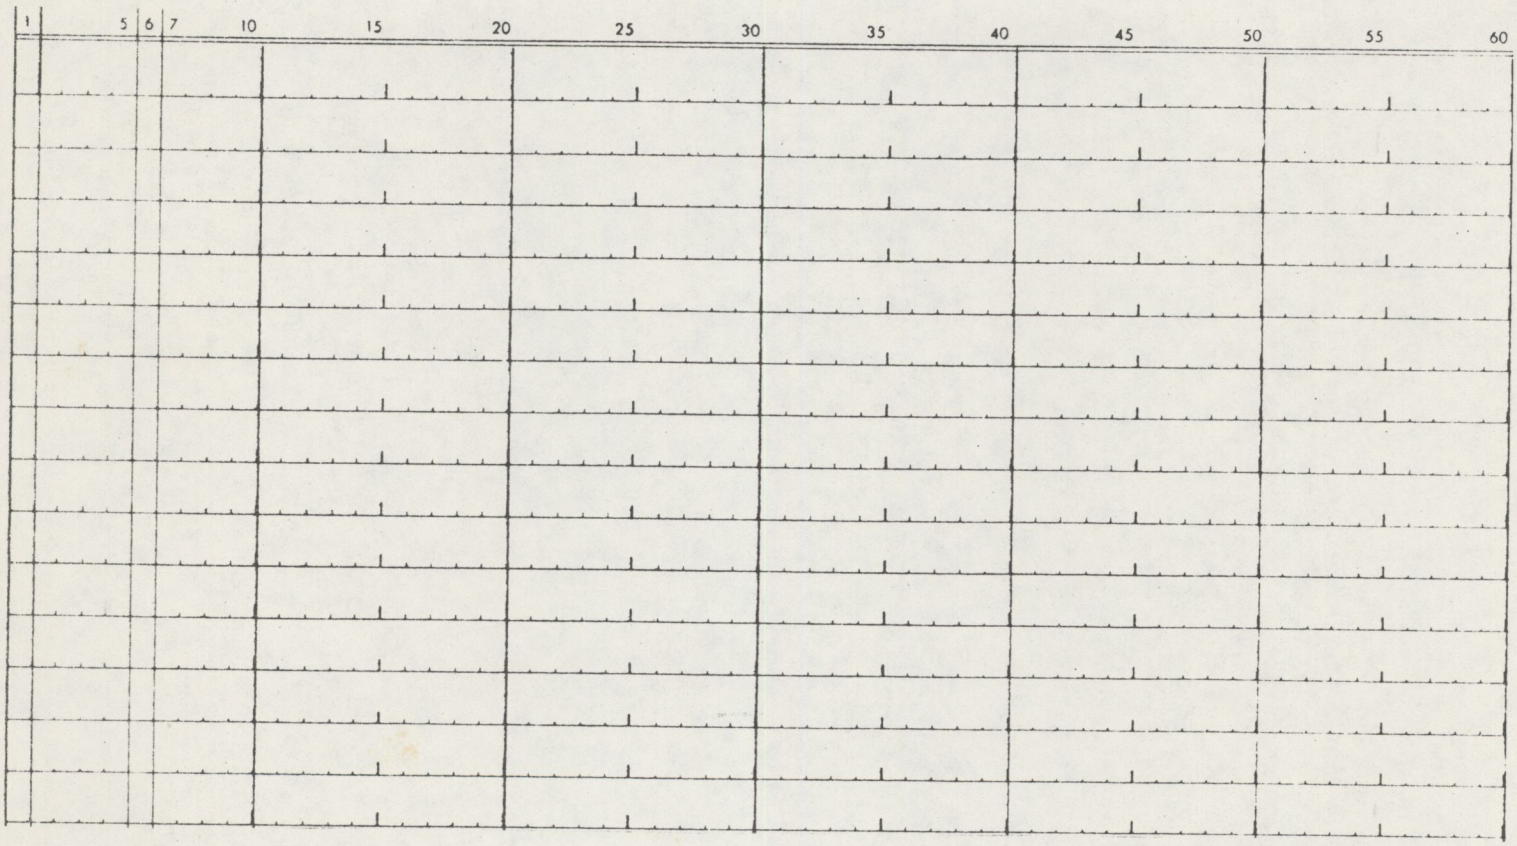
K201 - Quiz 6

1. You are given a set of cards with the following card layout:

Columns	Variable	Form
1-9	IDS	
12-17	NUM	
22-25	PTI	XX^XX
26-33	QTI	XXXXXX^XX
34-35	Y	XX^


Cards are sorted according to control variable NUM. The end-of-data card has a negative number in the field IDS. Prepare a complete FORTRAN program to read these cards and copy them on magnetic tape with no space between the fields on the tape. Be sure to terminate this program properly.
