

GEOJETSKI RAČUNI I.

HAMRLA JANA

Casio fx-48 (brez upoštevanja aritmetične hierarhije)

I. RAČUNSKI PRIMERI:

Casio fx 48

Dela s konstanto:

$$3+8=, 7+8=, 9+8=, \dots$$

$$10-3=, 15-3=, 34-3=$$

$$3 \text{ + } 8 \text{ = } 7 \text{ = } 9 \text{ =}$$

$$10 \text{ - } 3 \text{ = } 15 \text{ = } 34 \text{ =}$$

$$\frac{4,5}{2+3+4} =$$

$$2 \text{ + } 3 \text{ + } 4 \text{ = } F_1 \text{ } \frac{4,5}{\times} \text{ = } 0,5$$

$$46 : (-9) =$$

$$46 \text{ } \div \text{ } 9 \text{ = } F_1 \text{ } +/-$$

Dela s spomini:

$$(8,107 \cdot 5,3) + (3,5 \cdot 5,8) =$$

$$8,107 \text{ } \times \text{ } 5,3 \text{ = } F_1 \text{ } Min \text{ } 3,5 \text{ } \times \text{ } 5,8 \text{ = } +$$

$$F_1 \text{ } MR \text{ =}$$

Verižno računanje:

$$\frac{(3+4) \cdot 6 - 2}{5} =$$

$$3 \text{ + } 4 \text{ } \times \text{ } 6 \text{ - } 2 \text{ } \div \text{ } 5 \text{ =}$$
