

FACTOR.

See EXPRESSION in Section 1.13 and FUNCTIONS in Section 3 for more details.

1.11 TERM.

The lowerbound of a set is always zero and the set size is always the maximum of the base type of the set. Thus a SET OF CHAR always occupies 32 bytes (a possible 256 elements - one bit for each element). Similarly a SET OF 0..10 is equivalent to SET OF 0..255.

1.12 SIMPLE EXPRESSION.
