

Undergraduate Study

Undergraduate Study

FULL-TIME STUDY

The Faculty of Economics performs two separate programmes in full-time study:

- a four-year programme to acquire higher professional education - BUSINESS SCHOOL
- a four-year programme to acquire academic education - SCHOOL OF ECONOMICS

The programme of the SCHOOL OF ECONOMICS teaches students a more theoretical orientation of economics and they are trained either to perform work of high professional demand in research and analysis, or to manage companies and other organizations efficiently, as well as perform business operations at home and abroad.

The programme of the BUSINESS SCHOOL instructs students how to use their knowledge, analytical procedures and business techniques practically and immediately, and is closely connected to the problems of business practice. Not only does the programme develop its analytical possibilities, but it expressively develops negotiation and decision-making skills, and the realization of taken decisions on all professional and managerial levels in various types of economic and other organizations.

PART-TIME STUDY

The Faculty of Economics advertises three separated programmes as part-time study:

- a four-year study programme to acquire higher professional education - BUSINESS SCHOOL
- a four-year study programme to acquire academic education - SCHOOL OF ECONOMICS
- a three-year study programme to acquire higher professional education - HOTEL INDUSTRY AND TOURISM

Part-time study is performed at the headquarters of the Faculty in Ljubljana and in study

groups outside Ljubljana. The programmes BUSINESS SCHOOL and SCHOOL OF ECONOMICS are equivalent to the full-time study.

The programme HOTEL INDUSTRY AND TOURISM is performed in cooperation with the Faculty of Biotechnology. The programme is organized on the basis of the needs analysis of catering industry and tourism, as one of the most promising economic fields, and its objective is to acquire higher professional education.

DISTANCE LEARNING STUDY

Within the framework of a special PHARE project for regional cooperation, a centre, providing distance learning study in Slovenia, has been active at the Faculty of Economics since 1994. In the academic year of 1995/96 the Faculty of Economics is beginning to perform distance learning study experimentally in the first year of the BUSINESS SCHOOL in three study centres: Nova Gorica, Ptuj, Trebnje. In distance learning a student mostly studies independently, from specially prepared study materials. He can also communicate on-line, using computer network, and meet Professors and Tutors in study centres from time to time. The Faculty of Economics is a member of the international associations of distance learning EDEN and ICDE.
