

- * MAIL utility (requires the optional DECnet-VAX on each node for remote mail to another VAX/VMS system)
- * Error logging and print utility
- * Help facility
- * DCL command interpreter
- * DCL command definition utility
- * Monitor utility (for displaying system activity)
- * Various interactive and batch editors
- * Text formatter (DIGITAL standard runoff)
- * Log-in facility
- * Network command terminal facility (allows remote log-in to another VAX-11 system if the optional DECnet-VAX software license and kit is installed on each node)
- * Phone facility - An interactive communications utility with networking capability (requires the optional DECnet-VAX software license and kit on each node for remote communication)
- * VAX MACRO assembler with cross-reference capability
- * Linker with cross-reference capability
- * Install utility
- * Librarian utility with cross-reference capability
- * Common run-time procedure library
- * Symbolic debugger (for MACRO and most optional native-mode languages)
- * VAX Record Management Services
- * RMS file analysis and validation utility
- * RMS file conversion and loading utility
- * RMS Indexed Sequential file space reclamation utility
- * RMS file design and tuning utility
- * Files-11 ancillary control process
- * Disk quota utility
- * Back-up and restore facilities
- * Disk structure analysis
- * Magnetic tape ancillary control process
- * Sort/merge utility
- * File management facilities
- * File differences utility
- * File search utility (for searching the content of files)
- * Dump utility
- * Patch utility
- * System dump analyzer
- * Bad block locator utility
- * Software maintenance update procedure
